

USER INSTRUCTIONS

Welcome to KULLSMS Bulk SMS World.

Your account with Kullmessage has been activated. You have the option of either sending your messages with our desktop application or directly from the web-interface on our website (www.kullsms.com or www.kullmessage.com).

To use the desktop application, you have to download and then install it on your computer. Below are the links to download the desktop application for both HTTP and SMPP users.

For HTTP users:

http://121.241.242.106/desktopsetup/kullmessage_deploy.exe

for SMPP users:

<http://121.241.242.104/kullmessage/KullmessageDesktopClient.zip>

Enter your UserName:

PassWord:

& select your user type.

After login select the option (Single SMS or Bulk SMS)

For Single SMS, you have to put country code(234 for Nigeria) before mobile(don't add the plus sign(+))before country code)

For Bulk SMS you have to create text file(notepad only) which contains mobile no: country code plus mobile number for eg 2348027654354 for Nigeria 234 is the country code for Nigeria (don't add the plus sign(+)) before country code)

Mobile numbers should be arranged in this format:

```
2348023021889
2348035922256
2348069162003
2348034339813
2348035854752
2348069460426
2348051.....
2348021.....
2348041.....
```

Ensure your numbers are arranged on a straight line row format only and saved on the text file(notepad only)and attach it (Choose file)

In sender, you can put Name or Mobile no (Sender should not be more than either 11 Characters or 17 Numerical else your messages will not be delivered)

Write the message (not more than 160 characters) and then click on Upload to send (once only)

Thanks for using Kullmessage

Best regards,
